

WATER CONSERVATION - GENERAL - HILTON HAWAIIAN BEACH RESORT & SPA

Since 1998, *water consumption has decreased 35% per occupied room* at Hilton Hawaiian Village Beach Resort & Spa. Over 33 million gallons are saved each year through the following actions:

- Recycling air conditioning cooling water
- Converting to low-flush toilets and low-flow shower heads
- Adjusting sprinkler timers
- Switching to sand filters in ponds and pools
- Serving water only on request in all hotel-operated restaurants
- Offering voluntary guest involvement options:
 - 1) bed made by housekeeper but linen not laundered daily; and
 - 2) terry towels left hanging on the towel rack are not laundered
